

# Acer Presentation Key

## Dual displays with just one touch

Compared to the typical dual-display setup, which shows the same content on both your notebook screen and via the projector, a press of the Acer Presentation Key allows you to quickly present just your slideshow to the audience while simultaneously letting you view your presentation overview and speaker notes on your TravelMate notebook.

## Press to impress!

Project your slideshow to the audience while privately viewing speaker notes on your notebook.

### 3 Simple Steps

- ▶ Connect your notebook to an external display and open your presentation.

- ↳ Connectez votre notebook à un affichage externe et ouvrez votre présentation.
